

All India Institute of Medical Sciences Ansari Nagar, New Delhi-110029

# UMID Unidentified bodies & Missing Persons Identification portal and DNA database

**Skills Training Workshop organised by AIIMS, New Delhi**

**Our training program is intended to assist you in acquiring the skills to utilise our DNA Database to help the Indian public, the know-how of operating the Database and DNA profile matching**

✓ The UMID DNA database is established to streamline the process of identifying unidentified human bodies and/or remains and locating missing persons through the utilisation of DNA fingerprinting technology

✓ A civil database act as a repository of information relating to the physical description of the deceased including their belongings such as piece of clothing and other possessions. It can help the police to get an identification and subsequently contact and inform the family.

✓ Trainees will undergo training on how to use the Database, including step-by-step guidance on accessing and submitting phenotypic as well as genotypic data related to the deceased.

✓ Members of the Police and authorised laboratory staff can register for this workshop and check the DNA fingerprinting Lab at Department of Forensic Medicine and Toxicology for updated workshop timings.

## Why you should join?

**Learn about DNA fingerprinting Technology** ✓

**Importance of DNA Database in forensic casework** ✓

**Legal and ethical implications of DNA database** ✓
